MedAllies

INTEROPERABILITY LAB

The MedAllies Interoperability Lab is a Test environment with the capability to replicate a Production environment end-to-end system. It's an available service provided to enhance interoperability throughout the Direct community, with a strong emphasis on content consumption and display.

95%+ OF THE MARKET IS CONNECTED

FEATURES

- Allows vendors to test industry advancements, new workflows, and use cases with other targeted EHR vendors

- Vendor-only environment with MedAllies as a neutral mediator to promote interoperability testing

- Pairing of EHR products to replicate real world scenarios with 3rd party HISP / EHR combinations
